maybe a good example is salmon habitat - they asked that we list for temp; we agreed; now we need to work together to resolve that impairment.

I looked at this and don't understand it :).

It did remind me that I am providing a lunch time talk at NMFS next week about ways EPA and NMFS can partner since I am here in the building. It is informal but a nice opportunity to find out more about what they are doing and it overlaps with our work in general. I was thinking about using BDCP as a good example of a project that we should definitely be coordinating on, that we really are not at the staff level. The workgroup they mention in this document is something I think we should have been participated in, okay well, Bruce should have participated in. Maybe it is lead agency only??

I didn't have this for today's BDCP call so I was not able to follow the conversation. I will need Bruce's help to understand this. Maybe we can talk tomorrow?

Seems some of you did not get this handout earlier.

All,

Attached is a copy of the presentation that will be given today on the adaptive range process. The actual draft document from the AR tech team is being reviewed by the 5-Agency managers and is not yet ready for

distribution. It is likely that the presentation today will only take about a1/2 hour. Adding another 1/2 hour for questions and discussion, I would expect the entire topic will take about an hour to cover.

Mike

The agenda that was sent out last night for today's BDCP 5 Agency meeting notes the time is from 9:00-10:30 but as agreed at last week's meeting, this meeting will be extended - 9:00-11:00.

thanks

Beth
